

INTRASTACK SOLUTIONS

CRM Platform

Strategic Operating System

Engineering Team Briefing • Odoo Community Implementation

Revenue + Staffing + Delivery Control Tower

v1.0 | Engineering

TABLE OF CONTENTS

01 Core Principle & Platform Vision

1 Why Odoo is the single source of truth

02 Module Architecture

2 Must-have + optional community modules

03 System Data Flow

3 How every module connects end-to-end

04 CRM Pipeline Design

4 revenue pipelines & stage definitions

05 Custom Fields & Configuration

5 Deal classification, source tracking, flags

06 Automation Logic

6 Activity-based automation rules (Community)

07 Project & Delivery Module

7 Execution structure per engagement type

08 Timesheets & Utilization

Resource tracking & margin control

09 Contacts & Tagging Strategy

Unified relationship database design

10 Sales & Quote Engine

Rate cards, SOWs, managed service contracts

11 CEO Dashboard Design

KPIs, pipeline views & forecast metrics

12 Operating Playbook

Daily workflow & critical success rules

13 Scalability Roadmap

Phase 2 automation & AI enhancements

"Odoo is NOT your CRM."

It is your Revenue + Staffing + Delivery Control Tower

Revenue

All deals, pipeline
& forecasts tracked

Staffing

Bench, placements
& utilization managed

Delivery

Projects, timesheets
& execution tracked

Renewals

Managed services
& recurring revenue

leads → deals → staffing → delivery → invoicing → renewals

Must-Have Core Modules

CRM

All deals, pipelines, revenue tracking

Contacts

Clients, MSPs, primes, candidates, partners

Sales

Quotations, contracts, invoices

Invoicing

Billing, receivables, staffing invoices

Project

Delivery tracking, consulting engagements

Timesheets

Contractor tracking, utilization & margin

Employees

Internal + contractor visibility, bench

Discuss

Internal ops communication layer

Optional Modules

Purchase

Documents

Email Marketing

Use only when lightweight customized — not by default

 **Rule: Activate only what you need. Complexity kills adoption. Start lean, add modules as revenue grows.**

Every module feeds the unified Contact layer — eliminating siloed data forever

4 Independent Sales Team Pipelines — Never one generic CRM

P1

STAFFING

Fast Cash Flow

⚡ Revenue Speed

8 stages

P2

CONSULTING

High Margin

💎 Highest Margin

7 stages

P3

SUBCONTRACTING

MSP + Primes

💛 Partner Network

5 stages

P4

MANAGED SERVICES

Recurring Revenue

💰 Predictable MRR

6 stages

04 — PIPELINE STAGE DEFINITIONS

P1 — Staffing

1 New Requirement

2 Sourcing

3 Submitted

4 Interviews

5 Offer

6 Closed Won

7 Active Billing

8 Renewal

P2 — Consulting

1 Discovery

2 Qualification

3 Solution Design

4 Proposal

5 Negotiation

6 Closed Won

7 Delivery

P3 — Subcontracting

1 Outreach

2 Vendor Qualification

3 Capability Review

4 Approved Vendor

5 Active Engagement

P4 — Managed Services

1 Qualified Lead

2 Assessment

3 Proposal

4 Contract

5 Active Service

6 Renewal

Deal Classification	Service Category	Urgency Flag	Source Tracking
Staffing	Cloud	Immediate (0–30 days)	LinkedIn
Consulting	AI/ML	Short-term (30–90 days)	MSP Outreach
Subcontracting	Cybersecurity	Long-term (90+ days)	Prime Contractor
Managed Services	DevOps		Referral
	Data Engineering		Vendor Portal
	App Modernization		

Additional Fields: Expected Value (\$) • Decision Maker Flag (Yes/No) • These are mandatory on every deal record

06 — AUTOMATION LOGIC (COMMUNITY-FRIENDLY)

Community Edition has no advanced automation. We replace it with the Activities System.

R1

TRIGGER

New Lead Created

ACTION

Activity: "Qualify Lead within 24 hours"

Sales Lead

R2

TRIGGER

Stage = New Requirement

ACTION

Activity: "Submit 5 candidates in 48 hours"

Recruiter

R3

TRIGGER

Stage = Discovery

ACTION

Activity: "Prepare discovery checklist + schedule call"

Account Exec

R4

TRIGGER

No activity > 5 days

ACTION

Manual Task: "Re-engage prospect"

Manager

Every Closed Won deal automatically becomes a structured Project

Staffing Engagement

Consulting Engagement

Managed Service

Example: Cloud Migration Project Task Structure

1

Architecture Design

Define cloud architecture, review requirements & constraints

2

Infrastructure Setup

Provision environments, configure networking & IAM

3

Migration Execution

Lift & shift workloads, validate data integrity

4

Validation & Testing

Performance testing, security review, UAT sign-off

5

Handover & Docs

Runbooks, client training, knowledge transfer

Key Engineering Rules

Every CRM win triggers project creation

Assign project manager at deal close

Link timesheet to project from Day 1

Use task dependencies where applicable

Client access via portal if needed

70–85%

Target Utilization Rate for Consultants

Utilization % = Your Profitability Engine

Engineer Hours

Per project, per contractor tracked daily

Contractor Allocation

Bench visibility across 30+ engineers

Project Burn Rate

Hours consumed vs. budget — live tracking

Staffing Margin

Bill rate vs. cost rate delta by placement

⚠ Engineering Note: Timesheets must be linked to both Project AND Employee from day one. Retroactive fixes are expensive.

"Do NOT treat Contacts as simple CRM. Tag everything."

Client

Direct buyers of staffing, consulting & managed services

MSP Partner

Managed Service Providers — subcontracting channel

Prime Contractor

Federal & enterprise primes for subcontracting deals

Candidate

Active & bench engineers — 30+ talent pool

Vendor

Technology & tools vendors used in delivery

Recruiter Partner

External recruiters for sourcing & placements

Tagging System (apply to all contacts):

AWS Partner

Azure Partner

Cybersecurity Client

Staffing Buyer

Subcontracting Lead

Three Document Types — All Generated in Odoo Sales

Staffing Rate Cards

Resource name & role

Bill rate

Pay/cost rate

Duration

Gross margin %

Consulting SOWs

Scope of work description

Deliverables list

Milestones & timelines

Fixed fee or T&M rate

Acceptance criteria

Managed Services Contracts

Service scope & SLAs

Monthly recurring fee

Resource allocation

Renewal terms

Escalation procedures

\$2.4M

Total Pipeline Value

12

Open Proposals

8

Active Placements

\$340K

Revenue Forecast

Pipeline by Deal Type

Subcontracting Pipeline Status

⚡ Build this as an Odoo "Favorite" saved view per manager. No enterprise required.

MORNING

Check CRM pipeline — all 4 views

Review new inbound leads

Assign follow-up activities

Review overnight candidate activity

MIDDAY

Candidate submissions (staffing)

Proposal work (consulting)

Vendor outreach (subcontracting)

Client check-ins on active projects

END OF DAY

Update all CRM stages

Log today's activities

Flag stalled deals >5 days

Review total pipeline value

CRITICAL: No deal lives outside Odoo. No inactive deals allowed >7 days. Every opportunity must have: owner • value • stage • next action

01

RULE 01: Everything Enters CRM First

No leads, conversations, or referrals tracked outside Odoo. Zero exceptions.

02

RULE 02: No Deal Exists Outside Odoo

Email thread, spreadsheet, or sticky note tracking is a system failure — escalate immediately.

03

RULE 03: Every Opportunity Must Have 4 Fields

Owner assigned • Expected value entered • Stage set • Next action logged

04

RULE 04: No Inactive Deals Allowed >7 Days

If a deal has no activity for 7 days, the pipeline manager is notified automatically via Activity.

These 4 rules are NON-NEGOTIABLE during platform rollout and beyond.

Phase 1 (Now) → Stabilize → Phase 2 (Scale) → Automate → Phase 3 (Optimize)

PHASE 1
Foundation

Now → Month 3

- Odoo Community install & config
- 4 CRM pipelines live
- Activity automation rules
- Basic dashboard views
- Team training complete

PHASE 2
Automation

Month 3 → Month 9

- Automated email sequences
- AI lead scoring module
- Full ATS integration
- Subcontractor portal launch
- Invoice automation

PHASE 3
Intelligence

Month 9+

- Resource allocation engine
- Predictive revenue forecasting
- ML-driven pipeline health
- Advanced utilization analytics
- Odoo Enterprise evaluation

INTRASTACK SOLUTIONS

Build. Deliver. Scale.

The CRM platform is live when every deal lives in Odoo and every engineer is tracked.

Questions & Next Steps:

- Set up 4 CRM pipelines in Odoo
- Configure all custom fields
- Activate Activity automation rules
- Build CEO dashboard saved views
- Conduct team training session
